S3, Lambda, DynamoDB, Serverless Framework

Certifications

AWS Cloud Practitioner (Exp. Oct 2023)

EDUCATION

Lighthouse Labs

Full Stack Web Development
Jul 2020 – Oct 2020
Scholarship Recipient

Centennial College

Aircraft Maintenance- Avionics
Aug 2016 – May 2019

HOBBIES

- Playing Sports
- Playing Piano
- Reading
- Cooking

ABOUT ME

Eager to develop skills and experiences in full stack development; while working with great teams to ship amazing products. Coming from a traditional industry, I'm excited to witness the growth and disruption of technology on modern society.

PROJECTS

Shopify Clone 🌐 🌐

Front End: TS-React | Styled Components

Back End: TS-Node | GraphQL | Apollo | PostgreSQL | Sequelize | JWT | Stripe

Infrastructure: Serverless Framework | AWS Lambda | RDS | S3

A clone of the e-commerce giant Shopify.

Moodify 🌐 🌐

Front End: React | Styled Components | Material UI

Back End: Node.js | Express | PostgreSQL | Spotify API

Filter music based on Spotify's audio features data to create the perfect playlist for any mood.

Couch Potato 🌐 🌐

Front End: jQuery | HTML | SASS

Back End: Node.js | Express | PostgreSQL | Socket.io | Stripe | Twilio | Google Maps

Feature-rich fictitious e-commerce website. Includes payment processing, order confirmation, order lookup, and directions to store.

EMPLOYMENT

Jr. Full Stack Developer @ Sandbox - La boîte à films

Toronto | Nov 2020 – Present

Project 1 – Non-Profit Organization

- Built a gamified training module using Typescript, React, and Lottie.

Project 2 – Non-Profit Organization

- Integrated Serverless Stripe Donation by leveraging AWS Lambda.

Project 3 – Social Media App for Post-Secondary Students (ongoing)

- Integrated Spotify onto each user's profile, displaying their top artists so users can find more similarities between each other.
- Refactored an existing User Profile component into separate components increasing code reusability.
- Contributed to real time chat functionality (like Facebook messenger)
 - support for sending images via file system/camera
 - ability to mute a group chat for specified periods of time
 - adding users to a group/leaving a group and notifications for them

Avionics Maintenance Technician @ Air Canada

Toronto | Jun 2017 – Mar 2020

- Troubleshoot, installed, and inspected aircraft systems using wiring diagrams, schematic manuals, and fault isolation manuals.
